Your reclamation obligation continues beyond the expiration of your notice until such time as BLM determines that the reclamation is satisfactorily completed. The information required for submission of a complete notice is found at 43 CFR 3809.301. The plan of operations must be approved or the notice accepted and a financial guarantee accepted prior to any additional earth disturbing activities occurring at this site.

If you fail to submit a reclamation plan and schedule or a new notice or a new plan of operations for the outstanding disturbances at this site you will be in noncompliance. A noncompliance order will be issued and appropriate enforcement actions taken.

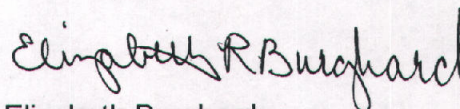

If you are adversely affected by this decision, you may request that the Utah BLM State Director review this decision. If you request a State Director Review, the request must be received in the Utah BLM State Office at P.O. Box 45155-0155, Salt Lake City, Utah 84145-0155, no later than 30 calendar days after you receive or have been notified of this decision. This decision will remain in effect while the State Director Review is pending, unless a stay is granted by the State Director. If you request a stay, you have the burden of proof to demonstrate that a stay should be granted.

If the State Director does not make a decision on your request for review of this decision within 21 days of receipt of the request, you should consider the request declined and you may appeal this decision to the Interior Board of Land Appeals (IBLA). You may contact the Utah BLM State Office to determine when BLM received the request for State Director Review. You have 30 days from the end of the 21-day period in which to file your Notice of Appeal with this office at Cedar City Field Office, 176 East DL Sargent Drive, Cedar City, UT 84721 which we will forward to IBLA.

**RECLAMATION STANDARDS**  
**for**  
**Exploration/Mining Activities, BLM Cedar City Field Office**

1. At the earliest feasible time, the operator will reclaim the area disturbed, except to the extent necessary to preserve evidence of mineralization. Reclamation will include reasonable measures to prevent or control onsite and offsite damage of public lands.
2. Reclamation will include but not be limited to:
  - a. Saving topsoil (top 3 to 6 inches) for final application after reshaping of disturbed areas.
  - b. Controlling erosion, landslides, and water runoff.
  - c. Isolating, removing, or controlling toxic materials.
  - d. Reshaping disturbed areas, applying topsoil, and revegetating where reasonably practicable.
  - e. Controlling noxious weeds invading the site.
  - f. Rehabilitating fisheries and wildlife habitat.
3. Access roads, unless otherwise approved by the authorized officer, will be closed by reshaping the disturbed area to near original contours, scarifying where compaction prevents seed covering, and revegetating with the mixture specified below. Water bars will be placed on steep inclines and access blocked to future vehicular traffic.
4. Unless otherwise approved in the acceptance of the notice, all high walls or material piles will be recontoured to slopes not steeper than 3:1 and revegetated using the recommended mixture.
5. Authorized pits with high walls in excess of 4 feet will be fenced or barricaded to protect unsuspecting public land users from injury. All shafts and adits will be covered or blocked to prevent unauthorized or accidental entry.
6. Seeding of disturbed areas will be done between September 30 and December 15. Seed should not be placed on top of deep snow. Seed beds will be prepared to a depth of 6 inches by ripping, discing, or harrowing. Seed will be planted with a rangeland or farm drill or broadcast seeded. If broadcast seeded, the seed will be harrowed or raked  $\frac{1}{4}$  to  $\frac{1}{2}$  inch into the soil. The seed amount described below will be doubled if the area is broadcast seeded. The recommended seed mixture to be used on all disturbed areas if applied by a drill includes:

Blue-bunch wheatgrass	2 lb / acre
Indian ricegrass (var. Nezpar)	1 lb / acre
Smooth brome grass	1 lb / acre
Pubescent wheatgrass	1 lb / acre
Small Burnet	1 lb / acre
Fourwing saltbush	$\frac{1}{2}$ lb / acre
Bitterbrush	$\frac{1}{2}$ lb / acre
Lewis Flax	$\frac{1}{2}$ lb / acre
Palmer Penstemon	$\frac{1}{2}$ lb / acre
7. All hazardous tailing dumps, materials or substances produced by the operation will be disposed of in accordance with applicable federal and state laws. All waste, debris, buildings, and materials will be removed from the site and deposited at appropriate waste facilities.
8. All dry drill holes will be plugged with uncontaminated native material to a depth of 5 feet. The top 5 feet will be plugged with cement. Drill holes which encounter water will also be cemented from at least 50 feet below to 50 feet above the saturated zone. The location, depth, and relative flow rate of any subsurface water encountered will be reported to the authorized officer.
9. Additional reclamation requirements may be needed on a case-by-case basis. These additional requirements will be issued by the authorized officer after consultation with the operator.
10. The authorized officer will be notified within 10 days of final reclamation.
